- ★ Safe on colors
- ★ Safe on all washable fabrics (not suitable for wool or silk)
- ★ High performance in all water types and temperatures
- ★ Made in USA

A brighter, whiter, feel-good clean!

*People, planet and septic safe*

## Ultra-Concentrated Laundry Booster and Multi-Purpose Cleaner

Just Oxy is a versatile, non-chlorine oxygen bleach for those who care about the health of their family and their planet.

Just Oxy contains sodium per carbonate, a solid form of hydrogen peroxide. It contains the highest level of oxygen bleach available compared to other nationally known brands of oxygen bleach.

Just Oxy is activated by water where it releases oxygen, breaking down organic dirt and stains and lifting them from the surface.

### Laundry Tips

Add Just Oxy with your detergent as follows:

Light soil: 1 oz /load  
Moderate soil: 2 oz /load  
Heavy Soil: 4 oz /load

Heavily stained garments: mix 4 oz of Just Oxy in a gallon of hot water; soak overnight then launder as usual.

Extremely stained items (ie; cloth diapers): to whiten, de-stain and deodorize, first run through pre-wash cycle to remove soil. Then run a hot water cycle, adding 4-6 oz Just Oxy with laundry detergent. Agitate briefly then stop cycle. Soak at least 1 hour - up to overnight. After soaking, complete the wash cycle.

### Carpet & Upholstery Tips

Use a spray solution.

Spray onto stain until wet.

Leave 20-30 minutes, spraying occasionally to keep surface dampened.

Blot with clean cloth or towel and allow surface to dry. If carpet: vacuum cleaned area when dry.

Removes blood, wine, pet stains & more.

Just Oxy can be used as a booster with existing carpet shampoos to increase cleaning power and stain removal. Add 2-4 oz Just Oxy per five gallons of water/shampoo solution just before use.

Ideal for people with allergies and Multiple Chemical Sensitivities

For Best Results

Use warm or hot water.

Test for colorfastness by first applying solution to an inconspicuous area and allow it to dry.

Do not leave diluted solution in a sealed container as Just Oxy will continue to give off oxygen and the container may leak. Just Oxy solution will remain active for up to 6 hours.

CAUTION: Eye irritant. Harmful if swallowed. Avoid eye contact. Do not ingest. If swallowed, drink a glass of water and consult a physician. Do not induce vomiting. In case of eye contact, flush gently with water for 15 minutes.

KEEP OUT OF REACH OF CHILDREN AND PETS

## Four Keys to Cleaning with Just Oxy

### TIME

The longer Just Oxy is in contact with the article being cleaned, the better the result. Wait at least the recommended time below.

### TEMPERATURE

The hotter the water used to dilute Just Oxy, the better it will work. Use the hottest tap water that the fabric or surface can tolerate. Do not use boiling water.

### CONCENTRATION

The more concentrated the solution, the more effective Just Oxy will be. See chart for guidelines.

### AGITATION

The more agitation or scrubbing action, the better the Just Oxy solution will clean.

## Just Oxy Easy Reference Chart

Cleaning Purpose	Just Oxy	Water	Method	Cleaning Time
Bath, Shower, Grout	4 oz	Per 2 oz	Scrub	20-30 min
Boat	4 oz	Per gallon	Scrub	20-30 min
